The team is looking for someone with:

• Exceptional analytical and conceptual thinking skills

• Understanding and Writing technical specifications for planned work

• Familiar with JavaScript, C#, .NET, HTML, SQL Server

• Proficient with Excel, PowerPoint, Outlook and Word

• Excellent in communication, interpersonal, troubleshooting and learning attitude

As a Developer at Sysfore, you'll get to:

• Think through hard problems in a consultancy environment, and work with amazing people to make the solutions a reality

• Work in a dynamic, collaborative, non-hierarchical environment where your talent is valued over your job title or years of experience

• Build custom software using the latest technologies and tools

• Craft your own career path

You'll be responsible for:

• Creating complex, enterprise-transforming applications on diverse, high-energy teams

• Using the latest tools and techniques

• Hands-on coding, usually in a pair programming environment

• Working in highly collaborative teams and building quality code

• Working in lots of different domains and client environments

• Understanding the business domain deeply and working closely with business stakeholders

Preferred Skills/Experience/ Nice to Have:

• Ability to collaborate with other developers and other team members• Advanced technical expertise in architectural design, development and implementation with specialization in multiple technology disciplines, platforms and applications

• Considerable knowledge in system integration

• Advanced technical, logical, analytical and problem-solving skills

• Excellent planning and organizational skills

• Excellent verbal and written communication skills

• Ability to lead a project team

• Working experience with Agile Methodology

If you relish the idea of being part of a community that extends beyond the work we do for our customers, you may find Sysfore is the right place for you. If you share our passion for technology and want to help change the world with software, we want to hear from you!
